

# A COMPLETE INTRO TO BONE PLATING

OCTOBER 16 - 18, 2023

Translational Medicine Institute - Fort Collins, CO

## Colorado State University Veterinary Continuing Education

This blended, online + hands-on, plating course is like NONE other! If you're going to be successful with your fracture repairs, you don't want just SOME of the important principles, you want ALL of them ... and this is THE course to put you on right path right from the very start! You'll prepare for a whopping 15 hours of "hands-on" training by enjoying the ease of our "anytime / anywhere" online learning modules. We've taken 4 hours of insightful, valuable learning and broken it down into short 20-minute "easy to absorb" sessions that are easy to fit into your day. Once here in our state of the future CE training center, our friendly, engaged, "no attitude" instructors will provide valuable demonstrations followed by your performing the same procedures on bone models and then cadavers. Each day postoperative radiographs will be made so that you can review and critique your work. Rather than rushing from lecture to lecture, we'll have time to discuss your work so that you can learn from it and ask those burning questions of yours! Clinical case discussions will put everything into context and allow us to discuss postoperative care and strategies to reduce complications.

**REGISTER BY JULY 16, 2023 AND SAVE \$200!**
